Summary

Frontend Engineer with hands-on experience building scalable, responsive web applications using React, Next.js, TypeScript, and Tailwind CSS. Experienced in developing data-driven dashboards, reusable component systems, and API-integrated platforms with strong attention to performance, usability, and maintainability. Currently contributing to production-level projects and leading frontend development efforts, collaborating with cross-functional teams to deliver high-quality user experiences.

Technical Skills

- **Languages:** JavaScript (ES6+), TypeScript
- **Frameworks & Libraries:** React, Next.js
- **Styling Tools:** Tailwind CSS, ShadCN UI, Responsive Design, Component Architecture
- **Deployment & CI/CD:** Vercel, GitHub Actions
- **Version Control:** Git, GitHub
- **API Integration:** RESTful APIs, Axios, Fetch
- **Data Visualization:** Recharts (charts, dashboards, data-driven UI)
- **Core Strengths:** Performance Optimization, UI Consistency, API Integration, Clean Code Practices

Experience

Frontend Developer

StudyBoosta StartUp Idea Pitch | [July 2024 – February 2025]

- Developed and maintained responsive pages for StudyBoosta, ensuring consistent functionality across all screen sizes.
- Designed and implemented a 'Courses' page, integrating dynamic video components with API-driven data for interactive learning.
- Collaborated with backend teams to build robust user authentication systems using custom APIs.
- Enhanced website performance by optimizing React components and minimizing rendering time.
- Designed and deployed the platform using Vercel and TypeScript for type-safe component architecture.
- Designed an educational platform's login/signup feature integrated with external APIs.

Frontend Developer

GDD-Impact | *August 2023 – Present*

- Developed and maintained user-friendly, responsive pages for two major projects:
 - **VTU Web Platform:** Enables users to purchase airtime, data plans, and utility bills. Built key interfaces such as the homepage, dashboard, and payment flow using React and Tailwind CSS.
 - **EdTech Class Management System** (*pre-launch*): Designed for primary and secondary school teachers to manage student records, attendance, assignments, and communication.
 - Integrated RESTful APIs for user authentication, wallet balance updates, and transaction history using Axios.
 - Collaborated with backend developers and UI/UX designers to implement intuitive and scalable features.
 - Improved performance by optimizing React components, reducing unnecessary re-renders, and applying lazy loading where applicable.
 - Participated in internal testing to ensure feature readiness and UI consistency across devices.
 - Familiar with deploying and maintaining production-ready apps using Vercel and GitHub CI workflows
-

Education

Bachelor of Engineering in Industrial Engineering

University of Benin | Graduated: 2024

Notable Projects

StudyBoosta

- Co-developed an educational platform offering students access to study resources and scholarship opportunities.
- Implemented dynamic "Courses" pages using React, integrated with APIs to display videos and interactive learning content.
- Built user authentication flows and action buttons for user queries and data handling via RESTful APIs.

VTU Web Platform (GDD-Impact)

- Designed and developed the frontend for a virtual top-up platform enabling users to recharge airtime, buy data, and pay bills.
- Built pages like the homepage, wallet dashboard, and transaction history using React and Tailwind CSS.
- Integrated secure API calls for user authentication and real-time wallet updates.

EdTech Class Management System (GDD-Impact – Pre-Launch)

- Created frontend components for a school-focused web app designed to help teachers manage classes, student records, and assignments.
 - Built interfaces for student enrollment, attendance tracking, and class dashboards.
 - Focused on responsive layouts and clean UI logic, ensuring smooth functionality across screen sizes.
-

Additional Information

- Experience working in remote, collaborative development environments
 - Strong ability to understand and improve existing codebases
 - Passionate about building clean, scalable, and user-focused interface
-
